

Important. Do not operate or power up the unit until you have read all of the information

The Model Rail Turntable offers one road which operates thru 180 deg shown in grey and 4 other roads either side of the centre line shown in black.

All of the information given relates to the Peco Turntables. Should you wish to fit this to any other unit and require help please contact us.

The approximate distance between track centres at the point of exit is 20 mm for n gauge & 40mm for 0 gauge.

This end must always be the incoming Track
